

MUHAMMAD ASIM

Full Stack Software Engineer | Backend & AI Automation

Islamabad, Pakistan • +92-312-5818370 • muhammadasim4927@gmail.com

muhammadasim-dev.vercel.app • linkedin.com/in/muhammad-asim • github.com/Muhammadasim225

PROFESSIONAL SUMMARY

Full Stack Software Engineer with hands-on experience delivering scalable, production-ready web applications across the MERN stack and Python/FastAPI backends. Comfortable owning features end to end, from requirement discussions and API design to Docker-based deployment, while collaborating directly with cross-functional and remote teams. Background includes REST API architecture, authentication (JWT & Redis), AI/LLM integrated automation (LangChain, n8n), and CI/CD pipelines. Known for taking ownership of problems beyond assigned scope and communicating technical decisions clearly to non-technical stakeholders.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+)

Backend: Node.js, Express.js, Python, FastAPI, REST API Design, JWT Authentication

Databases: PostgreSQL, MySQL, MongoDB, SQL Server, Redis

AI & Automation: LangChain, LangGraph, n8n, LLM Integration (OpenAI, Gemini, Groq), RAG Pipelines, HuggingFace

DevOps & Tools: Docker, CI/CD (Jenkins), Linux, VPS Deployment, Git/GitHub

Practices: Microservices-Oriented Architecture, Scalable System Design, Automated Testing (Playwright, Jest, Mocha/Chai), Code Quality (SonarQube, Pull Requests)

PROFESSIONAL EXPERIENCE

Junior Full Stack Developer

Jan 2026 - Present

FunPrime Technology • Islamabad, Pakistan (On-site)

- Own backend-focused feature development for production web applications, designing and shipping scalable REST APIs with Python and FastAPI.
- Containerize services with Docker and manage CI/CD pipelines to streamline deployment and reduce release friction.
- Build and maintain web scraping and data extraction pipelines, and implement automated testing with Playwright to safeguard reliability.
- Collaborate directly with React.js frontend teams in a Linux production environment to deliver end-to-end features.

Software Engineer

Jan 2025 - Dec 2025

OCTAOOP Digital Agency • Rawalpindi, Pakistan (Hybrid)

- Built and deployed multiple blogging websites end to end, from backend architecture to production hosting.
- Designed AI automation workflows using n8n and LangChain for lead management and business process automation.
- Integrated multiple 3rd-party APIs and webhooks to connect internal systems with external services in production environments.
- Developed backend services using Python, FastAPI, and Node.js, containerized with Docker, and managed full deployment pipelines for production-grade, real-world systems.

MERN Stack Intern

Sep 2025 - Nov 2025

10Pearls • Remote

- Delivered a production-level Notes application with full CRUD functionality using the MERN stack.
- Implemented structured logging with Pino and unit testing with Mocha/Chai and Jest to strengthen code reliability.

- Maintained code quality through Git pull requests and SonarQube checks, following industry best practices.

Web Developer Intern

Jun 2024 – Oct 2024

Appium Logics Solutions • Remote

- Contributed to full stack web development using HTML, CSS, JavaScript, Bootstrap, PHP, and Firebase.
- Designed responsive interfaces and collaborated with a remote team to optimize user experience.

KEY PROJECTS

AI-Powered Real Estate Lead Manager

AI Automation, React.js, Node.js, Express.js, FastAPI, REST APIs

- Built an AI-powered system to automatically classify, prioritize, and track incoming leads and messages.
- Designed scalable backend APIs with FastAPI and integrated them with a modern Next.js frontend.
- Improved lead-handling efficiency by automating workflows that were previously managed manually.

AI-Powered Smart Location & Lifestyle Advisor

Python, FastAPI, LangChain, LangGraph, LLM (Groq / Gemini / OpenAI)

- Built an AI-powered location recommendation system using FastAPI and LangChain agents.
- Integrated OpenWeather, Geoapify, and OpenStreetMap APIs for real-time weather and nearby-places data.
- Implemented a multi-step agent workflow (intent detection, location lookup, recommendations) using LangGraph, with PostgreSQL-based checkpointing.

Video Downloader & Media Aggregation Platform

FastAPI, Python, PostgreSQL, Docker, VPS Deployment

- Developed a backend system to download and stream video content from 15+ social media platforms.
- Built scraping pipelines with Playwright to reliably fetch reels, videos, and media content at scale.
- Dockerized and deployed the application to a production VPS, exposing APIs for download links and MP4 streaming.

Real-Time Chat Web Application

MERN Stack, Socket.IO, WebSockets

- Developed a real-time chat application supporting instant messaging over WebSockets.
- Optimized frontend-backend communication to improve message delivery performance and responsiveness.

EDUCATION

Bachelor of Science in Software Engineering

Feb 2022 – Jan 2026

National University of Modern Languages, Islamabad

CGPA: 3.2

CERTIFICATIONS

- Google Prompting Essentials Specialization — Coursera, Aug 2025 (AI Prompting, Prompt Engineering)
- Fundamentals of Git & GitHub — Microsoft Learn Student Ambassadors, Jun 2025 (Version Control, Git)
